REMARKS

In the Requirement for Information, the Examiner stated that there appears to be numerous other co-pending applications and issued patents which disclose or claim very similar and/or identical subject matter. The Examiner provided a non-exhaustive list of co-pending applications and patents that the Examiner believes may be related. The Examiner requested that the Applicant disclose all related applications and identify the specific claims of those applications and/or patents which may present double patenting issues with the instant application claims.

In response, Applicant is submitting an Information Disclosure Statement that lists co-pending applications and patents (eight in total) which it believes are related to the instant application. For each such co-pending application or related patent, Applicant has identified the specific claims which, upon information and belief, may present non-statutory obviousness-type double patenting issues with the instant application claims. Upon information and belief, Applicant believes that the co-pending applications and patents cited in the IDS do not pose statutory same-type double patenting issues under 35 U.S.C. 101 with respect to the claims of the instant application

Regarding issued patents, U.S. Pat. Nos. 6,887,270 and 6,921,390, Applicant hereby attaches executed Terminal Disclaimers to disclaim the terminal part of the statutory term of any patent granted, on the instant application which would extend beyond the expiration dates of the full statutory term of prior U.S. Patent Nos. 6,887,270 and 6,921,390.

Regarding the co-pending applications identified above:

U.S.S.N. 11/125,296 (US 2006/0264912);

U.S.S.N. 10/377,131 (US 2003/0224033);

U.S.S.N. 10/209,476 (US 2004/0022824);

U.S.S.N. 11/188,367 (US 2005/0271698);

U.S.S.N. 11/040,864 (US 2005/0161859); and

U.S.S.N. 10/846,706 (US 2005/0255230), Applicant respectfully states that Terminal Disclaimers will be filed if and when the "provisional" non-statutory obviousness-type double patenting rejection in each application is the only rejection remaining in that application. Pursuant to MPEP 804 I B,

If the "provisional" double patenting rejection in one application is the only rejection remaining in that application, the examiner should then withdraw that rejection and permit the application to issue as a patent, thereby converting the "provisional" double patenting rejection in the other application(s) into a double patenting rejection at the time the one application issues as a patent.

Thus, since the co-pending applications have not issued as patents and the claims may be amended in the future, Applicant respectfully exercises its right to address the provisional rejections at a future date.

Applicant states that it has now fully responded to the Requirement for Information pursuant to 37 C.F.R. 1.105. If the Examiner believes that further information is required or an interview would expedite consideration of the application, the undersigned attorney requests that the Examiner telephone her at the number indicated. The Office is authorized to charge any fees required, to deposit account number 50-1047.

Respectfully submitted,
